Biographies for Birdwatchers

The Lives of Those Commemorated in Western Palearctic Bird Names

Revised and expanded edition

In the thirty years since *Biographies for Birdwatchers* was published, the Western Palearctic bird list has lengthened. Vagrants and taxonomic revisions have added many new eponymic names to familiar ones such as Montagu's Harrier, Sabine's Gull and Steller's Eider. The expanded geographical range of this edition includes the Arabian Peninsula, Iran and parts of Central Asia, adding great ornithologists such as Christian Pander, Theodor Pleske and Nikolai Zarudny.

Vol 2 (266 pp): 179 people with subspecific eponyms.
